Introduction

"My mission is simple — turn students into world-class engineers, starting here."

Chandan Das

CEO Company

About Our Company

CSL Labs is the first and only robotics education provider in Northeast India, delivering national and international **competitive robotics** training aligned with **K–12 STEAM** education standards. Our programs go beyond classroom learning we prepare students to compete, innovate, and engineer real-world solutions.

We Specialize in:

- **Competitive Robotics** (National & International)
- **LEGO** & **Mechatronics** Systems
- Autonomous **Robotics & Control** Systems
- **Drone** and **IOT** designing
- **CAD Design** & Engineering Thinking Along with **3d Printing**
- **AI & Machine Learning** Foundations
- Structured STEM Curriculum aligned to **NEP-2020**

CSL Labs delivers India-standard K–12 STEAM and competitive robotics training — taking students from learning to real-world engineering and global competitions.

Mission & Vision

At CSL Labs, we aim to build future-ready engineers through world-class STEAM, LEGO, AI, ML, CAD and competitive robotics education, transforming students into confident innovators and positioning Northeast India as a national hub for engineering excellence.

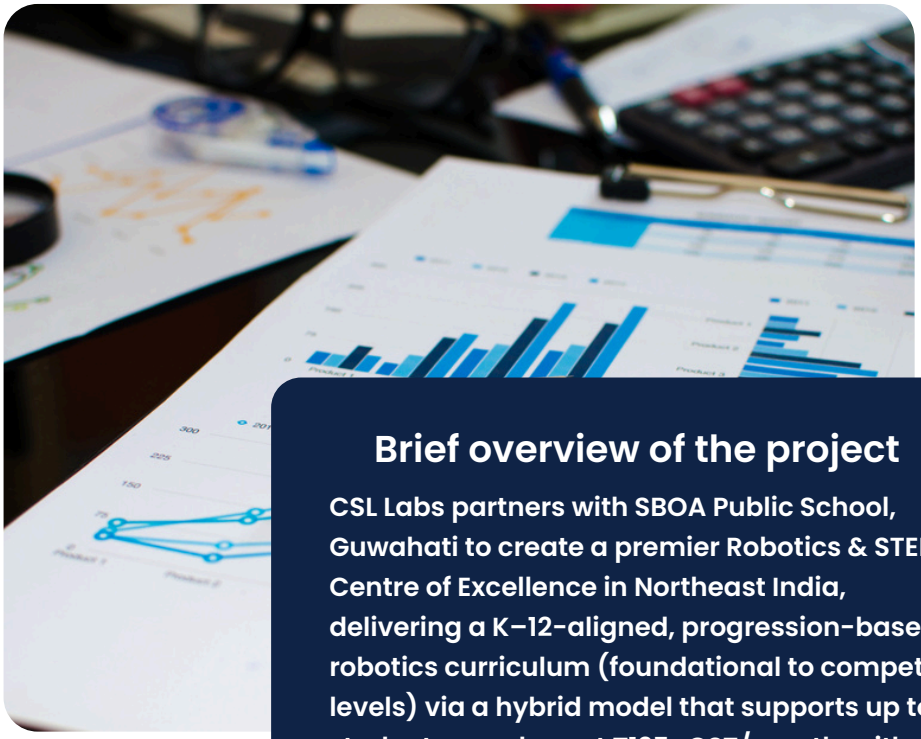
Our Mission

Our mission is to build future-ready engineers through world-class STEAM, LEGO, AI, ML, and competitive robotics education that transforms learners into confident innovators and leaders.

Our Vision

Our vision is to make Northeast India a national hub for world-class STEAM and competitive robotics education, producing globally competitive young engineers

Executive Summary



Brief overview of the project

CSL Labs partners with SBOA Public School, Guwahati to create a premier Robotics & STEM Centre of Excellence in Northeast India, delivering a K–12-aligned, progression-based robotics curriculum (foundational to competitive levels) via a hybrid model that supports up to 30 students per class at ₹125+GST/month, with national/international competition exposure, safety/ethics standards, and ongoing faculty development. The initiative enhances institutional prestige, NEP-aligned competencies, and offers a low-friction, scalable implementation that positions Assam as a benchmark STEM ecosystem.

The proposal emphasises a partnership model that minimises SBOA Public School, Guwahati operational burden while delivering a premium, competition-focused robotics curriculum.

Proposal Objective

01

Why SBOA Public School, Guwahati

- SBOA Public School, Guwahati stands as an institution known for academic excellence, discipline, and holistic student development. Integrating structured robotics education will:
- Strengthen your academic brand positioning
- Improve STEAM-based higher-education readiness
- Showcase tangible innovation achievements
- Build credibility through national-level competition results
- Attract high-value admissions from tech-focused parents
- This partnership positions SBOA Public School as a future-first institution, not just preparing students for exams — but preparing them for the world.

02

Our Unique Strength

- Unlike activity-based robotics workshops, we deliver a deep-structured engineering pathway:

Stage	Focus	Outcome
Foundation	LEGO & STEM Concepts	Logical & Engineering Thinking
Intermediate	Autonomous Robotics	Real-world Problem Solving
Advanced	Combat & Competitive Robotics	National-Level Performance

- We are the ONLY provider in Northeast India offering true competitive robotics training.

03

What Student Will Learn

- Students learn:
- Robotics & Automation
- Electronics & Sensors
- CAD
- AI & Machine Learning Basics
- Engineering Mindset
- Innovation & Research Approach

REVENUE AND DELIVERY MODEL

Revenue Model

- A transparent and growth-driven model:
  Covers:
- Faculty expertise
- Structured curriculum delivery
- Hardware access
- Competition mentorship
- Program management support
- This ensures zero operational stress for the school while establishing a premium offering.

Program Delivery Model

- Fee per student: ₹125+GST per month
- Class Size: Up to 30 students per section
- Delivery Model: Hybrid (On-ground + Guided technical support)
- Curriculum: K-12 aligned, structured progression
- Certifications: CSL Labs STEAM Track Certificates
- Exposure: National & International Competitions

Value To SBOA Public School, Guwahati

1. Academic & Institutional Prestige

- Recognized Robotics Excellence Center
- NEP-aligned competency learning
- National competition representation
- Strong brand differentiation

2. Student Development

- Logical reasoning
- Engineering design exposure
- Teamwork & leadership
- Competitive confidence
- Early-stage tech career advantage

3. Zero-Friction Implementation

- We manage training delivery
- Structured academic calendar integration
- Competition roadmap & mentoring
- Complete support ecosystem

4. Admissions & Parent Satisfaction

- Increases school attractiveness to technology-focused parents
- Strengthens premium positioning in a competitive school market
- Demonstrates clear return-on-education value through measurable outcomes
- Builds long-term loyalty and positive word-of-mouth

Why Partner With Us

Why Partner with CSL Labs??

- First movers in Northeast competitive robotics
- Proven expertise and structured methodology
- Local presence — long-term commitment
- National competition-focused training
- Scalable & sustainable learning model
- We don't just teach robotics —
- We build engineering leaders and competition-ready innovators.

Commitment to Quality

- We maintain:
- Ethical, student-centric delivery
- Safety-first practice environment
- Continuous faculty development
- Global learning standards

Next Steps

- We propose:
- Orientation session for parents & students
- Enrolment & section formation
- Program launch within 30 days
- Together, we can create a benchmark STEAM ecosystem for Assam
